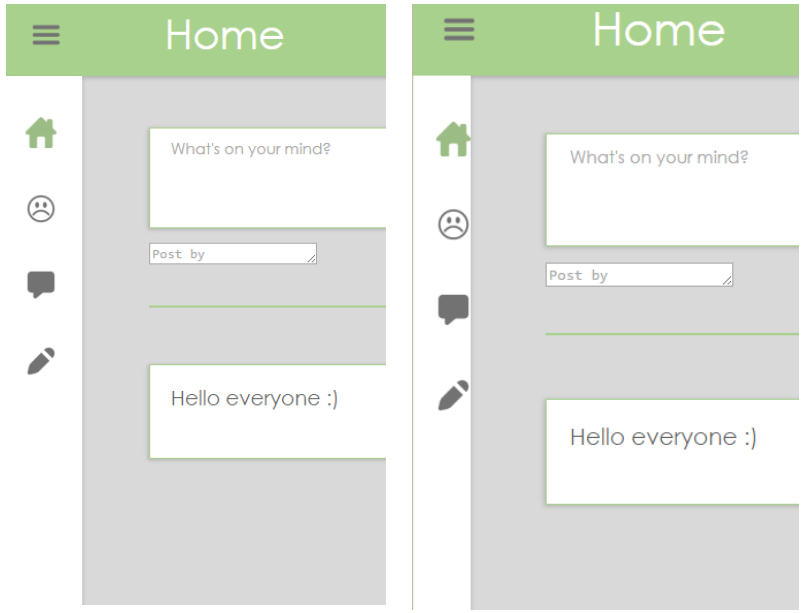
1. Wrong scale menu bar



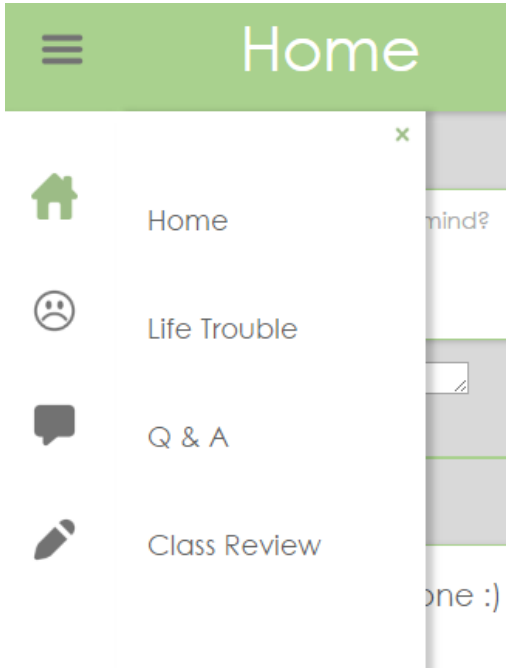
Problem:

- The menu bar's size scale is not constant. Its size depends on width and height of website.

Solution:

- Using grid to initialize menu bar's scale.

2. Color change



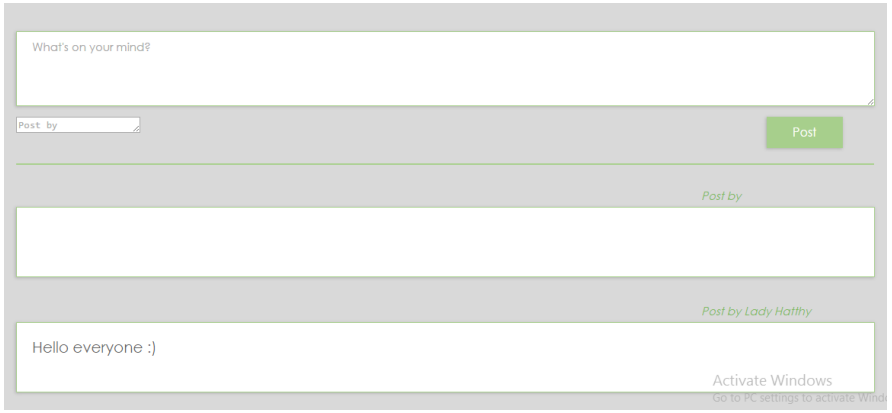
Problem:

- The menu bar's color does not change when pointer hovering over.

Solution:

- Change background color where is pointed.

3. Left blank



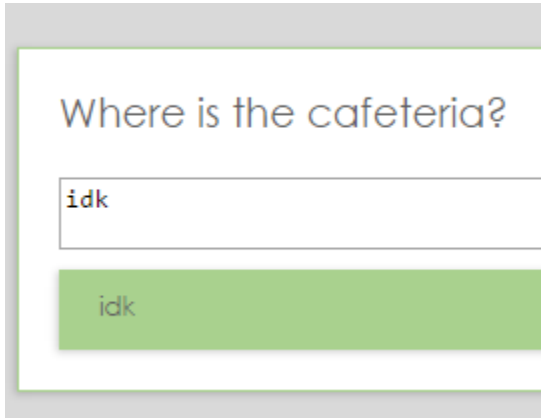
Problem:

- ‘Post’ button and effect still working even though text is left blank.

Solution:

- Change the ‘Post’ button and effect to disable class.

4. Text still appears



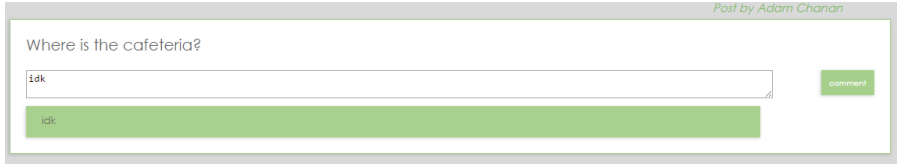
Problem:

- Text still appears after clicking ‘comment’ button.

Solution:

- Change comment box to none text.

5. No ‘comment by’ person



Problem:

- There is no telling who is comment on the post which could cause any mistake.

Solution:

- Add more of ‘comment by’.

6. No database connection

Problem:

- There is no connection with the database which makes all post and comment disappear every time user clicks refresh.

Solution:

- Use PHP to connect with database.
